Volumes may also be purchased separately. *The Archaeologist's Toolkit* is an integrated set of seven volumes designed to teach novice archaeologists and students the basics of doing archaeology. Students are led through the process of designing a study, doing survey work, excavating, properly working with artifacts and biological remains, curating their materials, and presenting findings to various audiences. The volumes—written by experienced field archaeologists—are full of practical advice, tips, case studies, and illustrations to help the reader. All of this is done with careful attention to promoting a conservation ethic and an understanding of the legal and practical environment of contemporary American cultural resource laws and regulations. The Toolkit is an essential resource for anyone working in the field and ideal for training archaeology students in classrooms and field schools.
