The road to success in investing and trading as I always say is paved with the smoking blown up accounts of investors and traders who did not learn the right information from the start of their time in this business and also were not utilizing a *smart plan* in their trading. It did not have to be a long hard and **expensive** road though, it can be a road paved with gold and be fairly easy if you just take time to learn this business the right way from the start on your first day, *keep it simple and it will be*.

Your core strategy and *smart plan* can and should be *very simple* and really all you will need to make money with the smart money every day in the live financial markets or *any* liquid market for that matter. Use a *smart plan* every time you initiate a position in the live market after doing your due diligence and research.

The professional advice I give you in this book will *empower you* to have confidence and *zero* fear of going in the live markets and accurately initiating a low risk high reward position with which you can have a *high probability* outcome from being a live market participant. Becoming a successful self-directed investor and trader is not nearly as difficult as one would think as long as they have the proper education and proper knowledge base right from day one, it takes a while but ***you can do it!***

If you need to learn the trading business from the ground up then this book is definitely a good starting point for you. I encourage you to read it *as many times as it takes* for it to become clear to you as to what you *do* and *do not* need to learn to be successful in this business from the start. There are *no money back guarantees* in the financial markets however you must know the *right* information from the start to have a chance of becoming consistently profitable and financially successful.
