Time Warps, String Edits and Macromolecules is a young classic in computational science. The computational perspective is that of sequence processing, in particular the problem of recognizing related sequences. The book is the first, and still best compilation of papers explaining how to measure distance between sequences, and how to compute that measure effectively. This is called string distance, Levenshtein distance, or edit distance. The book contains lucid explanations of the basic techniques; well-annotated examples of applications; mathematical analysis of its computational (algorithmic) complexity; and extensive discussion of the variants needed for weighted measures, timed sequences (songs), applications to continuous data, comparison of multiple sequences and extensions to tree-structures. This theory finds applications in molecular biology, speech recognition, analysis of bird song and error correcting in computer software.

### **From reader reviews:**

#### **Mildred Smith:**

In other case, little men and women like to read book Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series). You can choose the best book if you love reading a book. Provided that we know about how is important the book Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series). You can add understanding and of course you can around the world by a book. Absolutely right, because from book you can realize everything! From your country right up until foreign or abroad you will be known. About simple factor until wonderful thing it is possible to know that. #### **Shannon Thomas:**

Do you one of people who can't read enjoyable if the sentence chained from the straightway, hold on guys that aren't like that. This Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series) book is readable by means of you who hate the perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to deliver to you. The writer regarding Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series) content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different available as it. So , do you even now thinking Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series) is not loveable to be your top record reading book?

#### **Chrissy Stallings:**

Information is provisions for people to get better life, information presently can get by anyone on everywhere. The information can be a information or any news even restricted. What people must be consider when those information which is in the former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the resource are convinced. If you receive the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series) as your daily resource information.

#### **Lola Kelly:**

The book untitled Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparision (The David Hume Series) contain a lot of information on this. The writer explains the girl idea with easy way. The language is very clear to see all the people, so do definitely not worry, you can easy to

read this. The book was authored by famous author. The author will take you in the new era of literary works.
