Nerve and Muscle: Membranes, Cells, and Systems

Richard B. Stein

Nerve and Muscle: Membranes, Cells, and Systems Richard B. Stein

There has been a convergence in recent years of people from the physical and biological sciences and from various engineering disciplines who are interested in analyzing the electrical activity of nerve and muscle quantitatively. Various courses have been established at the graduate level or final-year undergraduate level in many universities to teach this subject matter, yet no satisfactory short text has existed. The present book is an attempt to fill this gap, and arises from my experience in teaching this material over the past fifteen years to students on both sides of the Atlantic. Although covering a wide range of biological topics from the level of single molecules to that of complex systems, I have attempted to keep the text relatively short by considering only examples of the most general interest. Problems are included whenever possible at the end of each chapter so the reader may test his understanding of the material presented and consider other examples which have not been included in the text.

From reader reviews:

Eleanor Landa:

The book Nerve and Muscle: Membranes, Cells, and Systems gives you the sense of being enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can being your best friend when you getting pressure or having big problem with your subject. If you can make examining a book Nerve and Muscle: Membranes, Cells, and Systems being your habit, you can get much more advantages, like add your personal capable, increase your knowledge about some or all subjects. You may know everything if you like open up and read a publication Nerve and Muscle: Membranes, Cells, and Systems. Kinds of book are a lot of. It means that, science book or encyclopedia or other folks. So , how do you think about this publication?

Irma Hughes:

In this 21st hundred years, people become competitive in each way. By being competitive now, people have do something to make them survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Sure, by reading a reserve your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading a new book, we give you this kind of Nerve and Muscle: Membranes, Cells, and Systems book as beginner and daily reading book. Why, because this book is greater than just a book.

Tracey Cook:

The book Nerve and Muscle: Membranes, Cells, and Systems will bring one to the new experience of reading any book. The author style to clarify the idea is very unique. When you try to find new book to learn, this book very suited to you. The book Nerve and Muscle: Membranes, Cells, and Systems is much recommended to you you just read. You can also get the e-book from official web site, so you can more readily to read the book.

Philip Martin:

Playing with family inside a park, coming to see the sea world or hanging out with close friends is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Nerve and Muscle: Membranes, Cells, and Systems, you are able to enjoy both. It is fine combination right, you still would like to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't buy it, oh come on its known as reading friends.
