The ITI (International Team for Oral Implantology) is a working group engaged in experimental research and in the exchange of scientific and practical experience in oral implantology. This book aims to present the theoretical foundations (anatomy, problems of materials used, metallurgy, biomechanics, tissue reactions, surgical principles and paraimplantal problems) and a comprehensive account of the ITI hollow-cylinder system. This edition features new chapters on complications and therapy for unsuccessful implants, with special emphasis on the microbiological aspects of aftercare.
