**My First Book About Backyard Nature: Ecology for Kids! (Dover Children's Science Books)** Patricia J. Wynne

Millions of creatures live in the backyard: beetles and bugs; butterflies and birds; turtles and toads; ants, earthworms, and tiny animals hidden in the grass or deep in the soil. These creatures lead busy lives, climbing trees, crawling over rocks, searching for food, and building nests. With this book's 46 pages of illustrations — each accompanied by fact-filled captions — kids can combine the fun of coloring with the fascination of discovering how all kinds of living creatures are linked together.

Realistic pictures to color depict the backyard through all four seasons and during the day and night. The captions identify different types of trees, flowers, and bushes; butterflies, moths, and birds; reptiles and amphibians; and many other plants and animals. Suitable for ages 8-11, this informative coloring book recaptures the excitement of the natural world that's right outside the back door.
