The Global Brain: The Awakening Earth in a New Century Peter Russell

We've seen the power of the internet to connect people around the world in ways never before known. This remarkable book argues that the billions of messages and pieces of information flying back and forth are linking the minds of humanity together into a single, global brain—a brain with astonishing potential for the Earth.

Peter Russell, an acclaimed author and speaker, weaves together modern technology and ancient mysticism to present a startling vision of the world to come—one in which humanity is a fully conscious super-organism in an awakening universe. He shows that the human potential movement is growing quickly while influencing business, politics, and medicine.

This new edition is fully updated for the challenges we face in the twenty-first century.
