Sources on Art Technology: Back to Basics

- The papers in this volume are from the 2014 biennial ATSR symposium held in Amsterdam

The papers in this volume are from the 2014 biennial ATSR symposium held in Amsterdam which focused on art technological sources and their aid to research. The papers focus on using source material to research works of art such as artist's notebooks, workshop inventories and documents on the trade in artists' material from the middle ages until today. They show the importance of source material for art historical as well as material-technical or conservation research to highlight the coherence between the style of a work of art and the materials and techniques used in its production. Ultimately, concluding that the disclosure of such source material is of paramount importance for both art-historical as well as material-technical and conservation research.
