Network Security: Authentication Mechanism in Wireless Network Ming-Chin Chuang

In recent years, the wireless communication technology rapidly develops and the mobile devices are in widespread used. The IETF Mobile IP working group has proposed the Mobile IP to support IP mobility, and it keeps a session connected when a mobile node roams from subnet to subnet. Novel network type is the mobile ad hoc network (MANET) which is formed by a set of mobile devices with limited power and using multi-hop communication capabilities without through any infrastructure. In order to move to an all-IP environment, we use Mobile IP to provide global Internet connectivity for ad hoc networks. However, the security problems are seemed more and more important. We must avoid routing packet attacks such as packet forgery attack and packet modification attack. In addition, we also must consider the authentication problem. Before using the resource, the mobile node must be verified whether legally or not. In this work, we will propose an efficient authentication mechanism in Mobile IP, and secure routing protocol in MANET. Finally, we propose an authentication mechanism in MANET which is aided with Mobile IP. And we can achieve the security routing and verify the user.

From reader reviews:

Robert Crawford:

Nowadays reading books become more than want or need but also turn into a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with knowledge books but if you want truly feel happy read one having theme for entertaining including comic or novel. The actual Network Security: Authentication Mechanism in Wireless Network is kind of e-book which is giving the reader unforeseen experience.

Kevin Mabry:

Hey guys, do you desires to finds a new book to read? May be the book with the title Network Security: Authentication Mechanism in Wireless Network suitable to you? Often the book was written by renowned writer in this era. Often the book untitled Network Security: Authentication Mechanism in Wireless Network is one of several books that everyone read now. That book was inspired many men and women in the world. When you read this book you will enter the new shape that you ever know ahead of. The author explained their plan in the simple way, consequently all of people can easily to recognise the core of this guide. This book will give you a lot of information about this world now. To help you to see the represented of the world in this book.

Meredith Butler:

Playing with family in a park, coming to see the sea world or hanging out with friends is thing that usually you might have done when you have spare time, and then why you don't try matter that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Network Security: Authentication Mechanism in Wireless Network, it is possible to enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh occur its mind hangout fellas. What? Still don't obtain it, oh come on its identified as reading friends.

Paula Daniels:

What is your hobby? Have you heard this question when you got learners? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as studying become their hobby. You need to know that reading is very important in addition to book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update about something by book. Many kinds of books that can you choose to adopt be your object. One of them is Network Security: Authentication Mechanism in Wireless Network.
