**VBA Programming for Microsoft Office Project Versions 98 through 2007 (Epm Learning)** Rod Gill  
Rod Gill's VBA Programming for Microsoft Office Project, Versions 98 through 2007 is the first book devoted to Microsoft Project VBA. Rod Gill helps you get the most from the worlds most popular Project Management tool by showing you ways to automate away the drudgeries of schedule manipulation, how to vastly enhance your reporting capabilities, and how to integrate with other Microsoft Office applications like Access and Excel. VBA Programming for Microsoft Office Project is packed with carefully commented code samples described through a one-step-at-a-time learning approach, each successively building toward more useful and complex application code. With 14 fully functional macros plus many samples of useful code snippets available for download from the official book site, you can start realizing efficiency gains on your very first day using this long-awaited resource. The books editors include Microsoft Project MVPs Gary L. Chefetz and Dale A. Howard, the authoring team who produced the only book on Project Server 2002, and seven titles covering Project and Project Server 2003 including the benchmark standards: Administering an Enterprise PMO using Microsoft Office Project Server 2003 and Managing Enterprise Projects using Microsoft Office Project Server 2003.
