Elements of Mathematical Ecology

Mark Kot

Elements of Mathematical Ecology Mark Kot

Elements of Mathematical Ecology provides an introduction to classical and modern mathematical models, methods, and issues in population ecology. The first part of the book is devoted to simple, unstructured population models that ignore much of the variability found in natural populations for the sake of tractability. Topics covered include density dependence, bifurcations, demographic stochasticity, time delays, population interactions (predation, competition, and mutualism), and the application of optimal control theory to the management of renewable resources. The second part of this book is devoted to structured population models, covering spatially-structured population models (with a focus on reaction-diffusion models), age-structured models, and two-sex models. Suitable for upper level students and beginning researchers in ecology, mathematical biology, and applied mathematics, the volume includes numerous clear line diagrams that clarify the mathematics, relevant problems throughout the text that aid understanding, and supplementary mathematical and historical material that enrich the main text.

From reader reviews:

Guadalupe Winn:

Reading a book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a book will give you a lot of new information. When you read a guide you will get new information mainly because book is one of numerous ways to share the information or maybe their idea. Second, reading through a book will make anyone more imaginative. When you studying a book especially fiction book the author will bring you to imagine the story how the figures do it anything. Third, you can share your knowledge to other people. When you read this Elements of Mathematical Ecology, you could tell your family, friends along with soon about yours reserve. Your knowledge can inspire others, make them reading a publication.

Bill Kelly:

Playing with family inside a park, coming to see the sea world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try point that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Elements of Mathematical Ecology, it is possible to enjoy both. It is fine combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout guys. What? Still don't obtain it, oh come on its identified as reading friends.

Ismael Soliz:

As we know that book is vital thing to add our understanding for everything. By a publication we can know everything we want. A book is a list of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This guide Elements of Mathematical Ecology was filled concerning science. Spend your time to add your knowledge about your technology competence. Some people has diverse feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a book. In the modern era like at this point, many ways to get book you wanted.

Margaret Garcia:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some e-book, they are complained. Just minor students that has reading's internal or real their interest. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Elements of Mathematical Ecology can make you sense more interested to read.
