Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) N. S. Robins

The primary groundwater management issue in many countries today is pollution. This may derive from a point source, perhaps a leaking solvent store at a factory, or it may be diffuse, such as the threat posed by the use of agricultural fertilisers and pesticides. The key to understanding the transport of a pollutant from the ground surface or near surface into an aquifer is an understanding of recharge. In turn, this allows the vulnerability of aquifers to pollution to be classified and appropriate landzones to be defined. Land zonation of different classes of aquifer vulnerability is a valuable tool for management and planning. In this volume the recent developments within the interlinked areas of groundwater pollution, aquifer recharge and vulnerability are highlighted. The book provides an up-to-date description of the relationship between pollution, recharge and vulnerability set against the current groundwater protection policies of the UK and Republic of Ireland. It also provides keynote overviews for each topic.

Also available:

Sustainable Groundwater Development (Geological Society Special Publication) - ISBN 1862390975
Climate Change and Groundwater - Special Publication no 288 - ISBN 1862392358

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Alexander Macdougall:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite publication and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130). Try to make the book Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) as your pal. It means that it can to become your friend when you feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know almost everything by the book. So , we need to make new experience along with knowledge with this book.

William Walker:

In this 21st centuries, people become competitive in most way. By being competitive currently, people have do something to make all of them survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the item for a while is reading. That's why, by reading a reserve your ability to survive improve then having chance to stand than other is high. For you who want to start reading the book, we give you this specific Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) book as nice and daily reading reserve. Why, because this book is more than just a book.

Leslie James:

Information is provisions for anyone to get better life, information today can get by anyone from everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider if those information which is within the former life are challenging be find than now's taking seriously which one works to believe or which one the particular resource are convinced. If you obtain the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) as your daily resource information.

Quincy Nelson:

Beside this particular Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) in your phone, it might give you a way to get more close to the new knowledge or facts. The information and the knowledge you may got here is fresh from oven so don't possibly be worry if you feel like an old people live in narrow town. It is good thing to have Groundwater Pollution, Aquifer Recharge & Vulnerability (Geological Society Special Publication Number 130) because this book offers to your account readable information. Do you often have book but you seldom get what it's interesting features

of. Oh come on, that would not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss that? Find this book and read it from right now!
